PROFESSIONAL SUMMARY

Software Engineer with experience developing and deploying full-stack web applications using JavaScript, TypeScript, React.js, Next.js, Node.js, and Express.js. Experienced in REST API development, database integration, authentication, responsive web design, SEO, workflow automation, and cloud deployment using AWS, Docker, and Vercel. Contributes to production websites and business applications, with a focus on maintainable code and practical solutions.

PROFESSIONAL EXPERIENCE

Software Engineer Feb 2026 – Present
Asia Softlab Pvt. Ltd. Thiruvananthapuram, Kerala

- Develop and maintain full-stack web applications using Next.js, React.js, TypeScript, Node.js, Express.js, and Firebase.
- Build and integrate REST APIs, application features, and workflow automation for production projects.
- Deploy and support web applications using AWS, Docker, Vercel, and GitHub Actions.
- Contribute to company websites and business platforms, including corporate web development, travel services, and employee management workflows.

Software Engineering Intern Jul 2025 – Dec 2025
Brototype Kochi, Kerala

- Built web application features through hands-on software development projects using modern web technologies.
- Practiced debugging, problem-solving, API integration, and writing maintainable code.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C, C++, Java
Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, OAuth 2.0
Databases and Services: MongoDB, SQL, Firebase Authentication, Cloudinary
Cloud and DevOps: AWS EC2, AWS S3, Elastic Load Balancing, AWS Lambda, Docker, Kubernetes, Vercel, GitHub Actions
Automation and Testing: n8n, Playwright, Manual Testing, Postman
Tools and Practices: Git, GitHub, Figma, npm, Object-Oriented Programming (OOP), SOLID Principles, SEO
Data Structures and Algorithms: Arrays, Linked Lists, Stacks, Queues, Hash Tables, Trees, Graphs; 100+ coding problems solved

PROJECTS

Asia Drone Store (ADS) - E-Commerce Platform Live Website | GitHub Repository
Full-stack e-commerce platform for professional drones, agricultural UAV equipment, spare parts, optical payloads, and accessories.

- Developed product catalogue features, category-based browsing, product search, and technical specification filtering.
- Implemented shopping cart, checkout, order tracking, and invoice-related workflows.
- Built administrative features for product and inventory management, pricing, and customer inquiries.
- Worked with payment gateway and multi-currency functionality where supported by the implementation.

Technologies: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS.

Employee Management System (EMS) Live Website
Workforce management application supporting employee attendance, leave management, task assignments, internal communication, and HR operations.

- Contributed to authentication and role-based access for administrative and employee workflows.
- Developed or maintained attendance tracking, leave requests, and approval workflows.
- Worked on task assignment, deadline tracking, status updates, and company communication features.

Technologies: Next.js, TypeScript, Node.js, Express.js, MongoDB, JWT, Tailwind CSS.

Book-Love – E-Commerce Website GitHub Repository
Developed a full-stack online bookstore with category browsing, wishlist management, coupons, reviews and ratings,

order management, and administrative tools.

- Integrated Razorpay payment functionality and Passport.js authentication, including Google OAuth where implemented.
- Developed user and admin workflows for books, orders, promotions, and sales reporting.

Technologies: MongoDB, Express.js, React.js, Node.js, Passport.js, Razorpay, Cloudinary.

Asia Softlab - Corporate Website Live Website | GitHub
Developed and optimized a responsive corporate website showcasing company services, drone technology, and geospatial solutions, with a focus on SEO and web performance.
Technologies: React.js, JavaScript, Tailwind CSS.

Eshaare Tours - Travel and Tourism Website Live Website | GitHub
Contributed to a responsive travel website featuring visa services, holiday packages, and REST API and third-party service integrations.
Technologies: React.js, REST APIs, Tailwind CSS.

AI Automation and n8n Workflows
Developed AI-powered workflows for web research, content generation, document processing, and email delivery using workflow automation and API integrations.
Technologies: n8n, Google Gemini API, Google Sheets API, REST APIs, JavaScript, Webhooks, Google Docs.

EDUCATION

M.Sc. Mathematics 2022
Kariavattom Campus, Thiruvananthapuram

B.Sc. Mathematics 2020
Sree Narayana College, Chathannur, Kollam

MERN Stack Software Training Course 2024
Brototype, Kochi, Kerala

ACADEMIC PROJECTS

Polynomial Rings
Academic project exploring algebraic structures and properties of polynomial rings.

Analytic Solutions of Integral Equations
Postgraduate project studying analytical methods for solving integral equations, including Volterra and Fredholm equations.
